San Miguel, Bulacan

PROFESSIONAL SUMMARY

IT Support Specialist with hands-on experience in technical support through freelance work, IT Staff roles, and an IT Staff internship. Skilled in diagnosing and resolving hardware, software, printer, and network connectivity issues, as well as installing and configuring Windows systems and applications. Experienced in providing remote and on-site technical support, preventive maintenance, and user assistance. Proficient in PHP, MySQL, HTML, CSS, and JavaScript, with a strong focus on reliable problem-solving, system stability, and excellent customer service.

PROFESSIONAL EXPERIENCE

Freelance Technical VA (Part-Time | Remote)

Jan 2020- Present

- Resolved 90%+ of remote technical issues using AnyDesk and other remote desktop tools, minimizing client downtime and maintaining uninterrupted operations.
- Installed and configured Windows operating systems and software applications across 50+ devices, ensuring systems were deployment-ready and properly configured.
- Diagnosed and resolved hardware and software issues for 30+ international clients, improving system stability and reducing recurring technical problems.
- Performed preventive maintenance and system optimization on 50+ computers, improving overall system performance and reliability.
- Created 10+ user guides and technical documentation, enabling clients to independently troubleshoot common technical issues and reducing repeated support requests.
- Troubleshoot 30+ printer, network, and application issues, restoring functionality and ensuring smooth day-to-day business operations.

IT Staff | Circle Asia Trading Corporation

May 2026 - Jul 2026

- Supported technical issues for 50+ warehouse and office users, resolving day-to-day IT concerns and reducing operational disruptions.
- Installed, configured, and troubleshoot 30+ computers, printers, and software applications, maintaining reliable workplace systems and minimizing downtime.
- Performed preventive maintenance on 30+ IT devices and supported daily IT operations, helping prevent equipment failures and maintain system reliability.

IT Staff Intern / IT Support | Metro North Medical Center and Hospital

Feb 2025 - May 2025

- Installed, configured, and maintained 50+ desktop computers, printers, and network devices across multiple hospital departments, ensuring reliable access to essential IT resources.
- Diagnosed and resolved hardware, software, and LAN connectivity issues for 100+ end users, minimizing downtime and supporting uninterrupted hospital operations.
- Installed and configured CCTV cameras and wireless access points, strengthening workplace security and improving network connectivity across hospital facilities.
- Supported the maintenance of the hospital's IT infrastructure across multiple departments, helping maintain stable and reliable day-to-day IT operations.
- Created user manuals and technical documentation for the Human Resources Ticketing System (HRTS), improving system usability and providing reference materials for future maintenance and support.
- Provided technical support and troubleshooting assistance to 100+ end users, resolving technical concerns promptly and improving user productivity.

TECHNICAL SKILLS

- IT Support: Windows 10/11 • Microsoft Office • Hardware & Software Troubleshooting • Computer Setup • Printer Support • LAN/WAN Networking • AnyDesk • TeamViewer • Remote Desktop Support • Technical Documentation • End-User Support • Preventive Maintenance • CCTV Installation
- Web Development: PHP • MySQL • HTML • CSS • JavaScript

PROJECTS

Human Resources Ticketing System (HRTS)

PHP | MySQL

- Developed a web-based ticket management system to streamline HR support request submission and tracking.
- Designed and implemented a centralized database to improve ticket organization and monitoring.
- Created database-driven workflows to simplify support request management and enhance operational efficiency.
- Prepared user documentation to support system adoption and future maintenance.

CLiMS (Cooperative Loan Management System)

Project Manager | Full Stack Developer

PHP | MySQL | HTML | CSS | JavaScript

- Led a four-member development team in building a web-based cooperative loan management system.
- Designed the system architecture and MySQL database to support secure and efficient loan processing.
- Developed loan processing, authentication, and reporting modules to automate key business operations.
- Built responsive user interfaces and coordinated project implementation to ensure successful project delivery.
